**WHAT:**
While many people in recovery feel that a strong spiritual program is essential to their success, treatment providers are often uncertain about approaching this subject with clients. This workshop will attempt to provide a working definition of spirituality, identify the differences between spirituality and religion, increase awareness of diverse faiths and how they can apply to recovery, how to help clients develop meaningful belief systems without belief in a Higher Power, and how to address client needs while maintaining objectivity. The workshop will include lectures, group activities and a panel discussion.

*Course meets the requirements for 6 hours of continuing education credit as required by the Missouri Substance Abuse Professional Credentialing Board and the Missouri Social Worker's Licensure Board.*
